May 2021

Updates of Stage 6 KISS Resources
(Bio, Chem, Physics & EES)

1. Eligibilty

If your school purchased KISS modules for the Stage 6 "new syllabus" between approximately September 2017 to December 2020 you may have received some materials which were incomplete due to "shortcuts" taken in order to supply resources during the syllabus implementation period. These "shortcut" modules have since been updated and completed and are available without charge to schools which purchased during the times above.

To check your eligibility, examine the folder names (NOT filenames) of your Stage 6 KISS modules. All updated versions have a folder name such as   **Bio_4_u20**   or   **Chem_7_u21** where the "u20" or "u21" indicates an updated version.

Within each folder there should be 4 PDF files. (In one case 5 files)

If folder names do NOT have the "u20" or "u21" designation, then you should apply for updates.

2. Apply by Email Only

a) Send your application from your school-based email address.
   We will send updates as replies to that address only.
   Applications from private addresses (eg gmail) will NOT be processed.

b) Send your application to mail@keepitsimplescience.com.au

c) In the "SUBJECT LINE" type the name of your school.
We will check our records to see which modules your school has purchased and send updates of those modules only.

d) In the "BODY" of the email, please type your name and position on staff.

e) Each updated module will arrive as an attachment to a separate email, in compressed ".zip" format. (It is best to SAVE each attachment to a convenient location before attempting to open it.)

f) If (for example) you teach Bio and we send you Chem & Physics updates as well, please pass those to the appropriate staff member(s).

3. Replace ALL your "old" KISS files with the updates received

As well as adding to the previously incomplete modules to bring all our formats to the same standard, we have taken the opportunity to correct some errors and omissions in a number of other modules as well. Please delete all earlier versions and replace them with the updates received.

4. Problems?

Please phone me.
